Keynote Speeches:

Why in the World would ANYONE want to work for YOU?

If you can't answer this question clearly and concisely, you're in for real challenges in the future. A major strategic issue facing healthcare organizations is staffing. Those organizations that are able to attract and retain the best people will be most competitive in their marketplace in the future. Those that fail to attract and retain great people will be unable to grow, and will consistently disappoint patients and customers.

Stephen Tweed, healthcare strategist and professional speaker, has worked with a national expert in recruiting to develop this program to help you create *Strategic Staffing Advantage*TM. He'll help you develop skills to recruit and retain the best people to staff your organization. He will demonstrate how to increase your staffing, reduce your recruiting costs, decrease your "lost opportunity costs," gain competitive advantage in the recruiting marketplace, and grow your business.

Objectives: As a result of this program, participants will be able to...

1. Describe eight trends in healthcare workforce development.
2. Define the seven sources of *Strategic Staffing Advantage*TM.
3. Develop your *Strategic Staffing Action Plan*.
4. Apply tools to measure and manage your recruiting success.
